

# Ohio's Decision Framework

DRAFT

District IRN:

District Name:

2005-2006, 2006-2007, 2007-2008 Data

**Introduction:** The decision framework (DF) is a decision-making process designed to assist districts in making informed decisions – based on what their data tell them -- about where to spend their time, energy, and resources to make significant and substantial improvements in student performance. *(For a complete introduction click the link below)*

[Decision Framework Introduction.pdf](#)

**Instructions:** This document includes data for this district for the past 3 years. Use this data along with information that you have collected/observed locally to

complete the following questions. Cells with a yellow background contain a drop-down list of choices.

*(Click to see options)*

Cells with a blue background are to be completed by entering data.

To assist with analysis, data in some tables can be viewed with respect to a cut off (minimal) score. Results below the cut score are displayed in red. The slider control can be used to change the cut score.

(Cut %) *(Slide to change cut score)*

Results are posted at the end of each section. View the Profile Tab to see the results for the entire process.

To clear entries from cells select the cell and press "Delete" key.

Begin with the Level I tab. Use the Proficiency Data for your District (Tabs 1-3).

Indicate your level of concern (using the drop-down menu in each grade/subject cell).

Be sure to **Save your file** before closing.

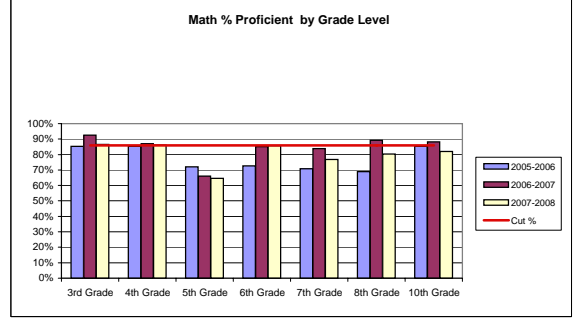

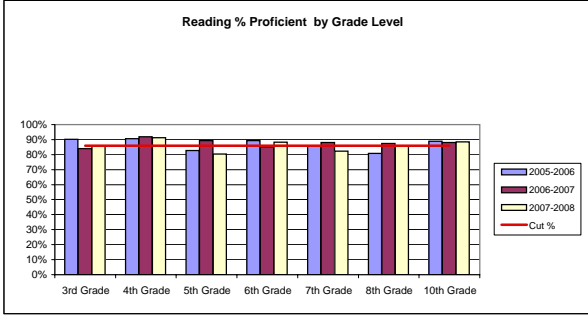

**To print the contents of this document**

**Individual pages** can be printed by selecting File>Print.

The **entire document** can be printed by selecting File>Print and choosing "Entire Workbook"

**Individual graphics** can be printed by clicking on the graphic to select it, then choosing File> Print
