BED BUGS (Cimicidae)

Students found to be infested with bed bugs are not required to be excluded from school but must follow the following guidelines:

- Parent will be called when bed bugs are identified either by bites on skin or actual bed bug on personal belongings. The parent/their designee must bring a change of clothing that has been in a dryer for 30 min on the high setting.
- Hamilton County Health Department will be notified.
- The student will be checked upon arrival to school for 7 consecutive days for bed bugs. At this time personal belongings are to be bagged and sealed (such as backpacks, coats). Three additional weekly checks will also be complete.
- Classrooms will be disinfected as determined by the school nurse and principal.
- As the Hamilton County Health Department issues new guidelines on this matter, this policy will be reviewed for necessary revisions
